ALUMINUM COMPOSITE PANEL

Innovative Solutions for
Modern Architecture

www.alufly.com

Vision

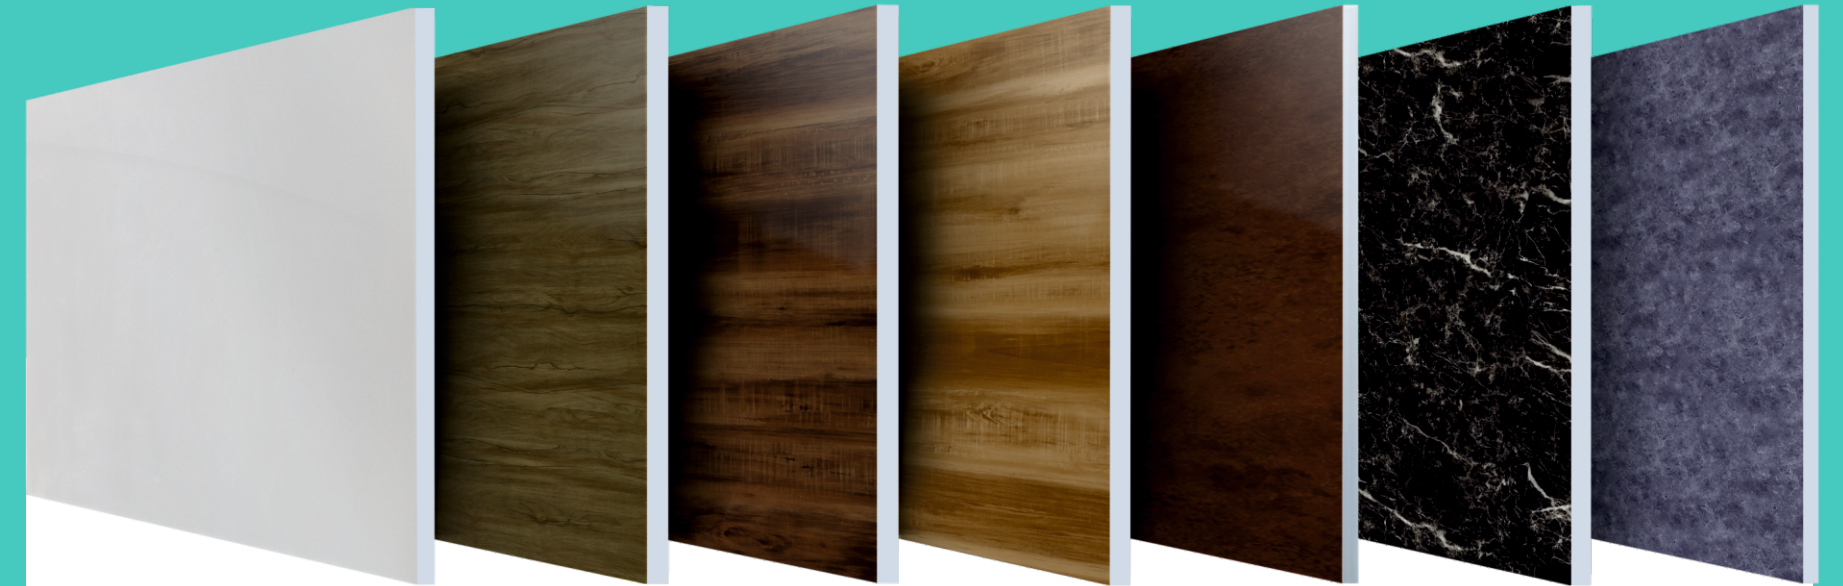

Our goal is to be the leading company that recognizes, understands, and meets the demands of clients in terms of both products and services.

About Us

Alufly is a leading manufacturer of ACP sheets in India. We manufacture, sell, and distribute cutting-edge, robust, long-lasting, and eye-catching building materials that combine style and functionality.

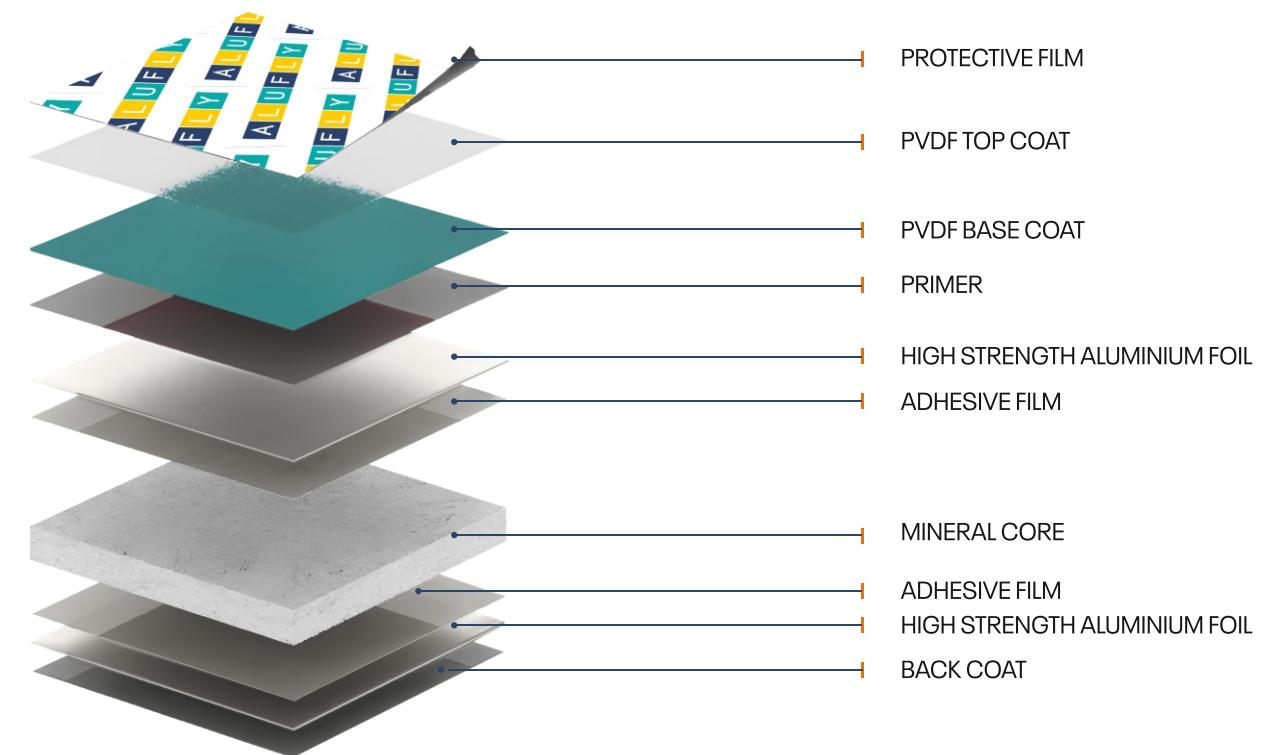

Our superior ACP sheets make it possible to create contemporary, visually striking exteriors and interiors that excel in both performance and aesthetics.

Whether used for cladding, signage, or decorative purposes, Alufly's ACP sheets are designed to meet the highest industry standards.

Product Composition

Our product is made from a high-quality non-aluminum core bonded between two aluminum sheets. Polyethylene or a combination of polyethylene and a mineral filler that resists fire can make up this core. Because these materials are strong and lightweight, they are used in large-scale construction projects like building construction.

Product Range

Aluminium Base HPL | Aluminium Composite Panel
Partition Panel | Signage

Woods | Marble | Metallic | Solids | Glossy | Sparkle | Mirror | Brush | Stone | Shine | Sand

Platinum Series	<h1>10 YEARS</h1> <p>WARRANTY</p>	Partition Series
Gold Series		Wooden Partition Series
Silver Series		Printed Series
	ATM Series	

Fire Retardant (FR) ACP

- FRB1 having more than 72% mineral content.
- FRB1 is a non-halogenated FR material that produces water vapour when it heats up. It does not produce toxic gases like the halogenated materials.
- Magnesium hydroxide (MDH) is the non-halogenated material that is mixed with PE to form the core of FR products. MDH has a better fire-resistance performance than aluminium trihydrate (ATH), the other non-halogenated material, owing to higher decomposition temperature. Furthermore MDH is more environment-friendly than other similar materials.
- MDH delays the PE transformation from solid to plastic (the point of ignition) up to 360°C, by releasing water molecules and bringing down the temperature continuously.

FEATURE

100% WATER PROOF

EASY TO INSTALL

BFT Guard : BORER, FUNGUS AND TERMITE RESISTANT

UV RESISTANT

LIGHT WEIGHT

WEATHER RESISTANT

EASY TO CLEAN

Aluminium Composite Panels (ACP)

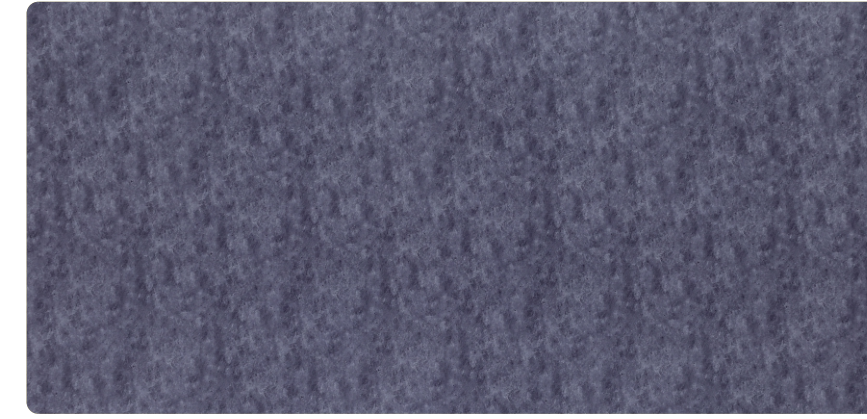

Our Aluminium Composite Panels (ACP) sheet in 2mm to 6mm thickness offers a perfect balance of durability, flexibility, and sleek design. Ideal for both interior and exterior applications, these panels provide superior weather resistance, lightweight strength, and a smooth finish. Whether for facades, signage, or cladding, ACPs deliver a modern and professional touch to any project. It is available in a variety of stunning series, each designed to enhance architectural aesthetics.

High Pressure Laminates (HPL)

High-pressure laminates (HPL) in 6mm thickness combine exceptional durability with refined aesthetics, making them ideal for both interior and exterior surfaces. Known for their impact resistance, weatherproof properties, and rich textures, HPL provides a versatile solution for cladding, furniture, and decorative applications, delivering long-lasting performance with a modern finish.

STONE SERIES

Brings The Rugged Elegance Of Natural Stone, Designed To Replicate The Textures And Colors Of Real Stone, And Provides A Sophisticated Finish That Is Both Durable And Lightweight.
